SPORTS UTILITY TOP

L200 SPORTS UTILITY TOP

Design & Utility

The Sports Utility Top (SUT) has been designed especially for your L200 by Mitsubishi Motors. It has been manufactured according to our highest quality standards. It's tough, stylish and sporty, offering versatile use for both private and business users. Tinted side windows add to the overall sporty image of your L200.

Sliding front window (Double Cab only)

Through your L200 rear cabin window you can slide open the front window of the SUT. This allows you to be in contact with your pets when they are transported in the SUT or to safely store very long items. The front window of the SUT cannot be accessed from the outside, so your items are safe and secure.

Secure

The rear window has a double locking mechanism. The side windows have limited opening and are secured with rigid hinges.

Durable

The SUT has been finished with stainless steel hinges and fitting materials, not only ensuring no-rust, but also excellent trouble free operation for many years. The SUT has been painted with high quality paint, exactly matching the vehicle's body colour. There's no colour fading from UV light exposure and an innovative water defense system makes the trunk as weather-tight as can be.

Practical

The interior is finished with strong fibre material, which not only looks very nice but also provides excellent protection against damages from accidental hits with sharp or bulky items when loading these into the vehicle bed. The automatic interior halogen light provides extra convenience, allowing you to have a clear view from the front to the rear of the loading bed.

Bed liner

The SUT can be combined with an under rail bed liner or soft bed liner.

SPORTS UTILITY TOP FOR L200 DOUBLE CAB AND CLUB CAB

APPLICATION	PART NUMBER
Double Cab	M313658xxx
Club Cab	M313657xxx
