MANAGEMENT SOFTWARE
PROFESSIONAL COLOUR
MANAGEMENT

you can

The complete collection of profiling tools for end-to-end colour workflow.

i1 Process Control Software

i1 Process Control

i1 Process Control has been carefully designed to provide an easy and intuitive application that can be used on a daily basis to help achieve consistent and controlled digital colour printing in imagePRESS and imageRUNNER Advance C9000 series devices.

The software's simple interface allows users to build International Colour Consortium (ICC) profiles for both display and CMYK output devices such as Canon imagePRESS digital presses. i1 Process Control spot colour tools provide exceptional control over critical spot colours so you can protect your clients' investment in specific brand colours.

The version of i1 Process Control is determined by the engine that is ordered.

i1 Basic Pro

An affordable, professional spectral colour measurement solution that's easy to use, and includes everything you need to create professional, custom ICC profiles for your monitors. It also includes PANTONE® Color Manager for managing digital colour libraries and colour picking, and, is easily upgradeable anytime to complete workflow functionality with i1 Publish Upgrade.

i1 Photo Pro

Specifically designed for discerning photo professionals to manage their RGB workflow from camera to display and projector to print. The included i1 Profiler software delivers high quality colour results that especially target highlight and shadow details and delivers greater colour accuracy for more neutral greys and natural skin tones.

i1 Publish

A software suite that contains features and applications that are designed to accommodate all skill levels, and provide the power and control needed to create the highest quality colour profiles. Users can choose between a 'basic', wizard-driven interface; or an 'advanced', user-driven interface to create high quality, precise, custom colour profiles for monitors, projectors, printers, and presses.

i1 Publish software suite includes: i1 Profiler v1.x software, PANTONE Color Manager software, ColorChecker Proof Target, ColorChecker Passport Camera Calibration software and mini ColorChecker Classic target; Beamer (projector) holder and soft-sided storage case.

i1 Publish Pro

i1 Publish Pro is designed for professionals who rely on accurate colour throughout their digital workflow – from cameras, monitors and projectors to RGB and CMYK+ printers and presses. Get the most colour accurate and repeatable results every time.

i1 Publish Pro includes: i1 Pro spectrophotometer; ambient light measurement head; monitor holder; positioning target; scanning ruler; backup board; i1 Publish Software Suite:
